

## Part IV. Enrolling Students

### 4.1 Setting an Enrollment Password

#### What is this feature?

In order to keep unauthorized students from enrolling in your course, we strongly encourage you to set an enrollment password that students must have the first time they access your class. You can give this password out to students at the beginning of the semester. Once your students are enrolled, you can change the password, preventing any new students from joining.

#### From your course's homepage:

1	<p><b>CLICK</b> “Settings,” located in the Administration block on the left side of the page.</p>	
2	<p><b>TYPE</b> your new password into the “Enrolment key” field.</p>	
3	<p><b>CLICK</b> “Save changes,” located at the bottom of the page.</p>
